SUMMARY

Highly strategic, cross-functional Product and Program Executive with 15+ years of experience steering enterprise-scale business transformations, machine learning solutions, and global platform integrations across Fortune 500 ecosystems. Recognized for a rare blend of deep technical acumen, multi-million-dollar financial savvy, and an integrative leadership style that harmonizes complex data systems with core business performance. Proven history of building first-time-right solutions, navigating volatile organizational friction, and mobilizing cross-cultural global teams to drive rapid product adoption and maximize bottom-line profitability. Continuously leverages advanced generative AI and LLM frameworks to fuel rapid prototyping, accelerate proof-of-concept validation, and optimize development velocity.

CORE EXPERTISE

- **Product & Portfolio Strategy:** Product Strategy, Vision, Roadmap, End-to-end Product Lifecycle, Decommissioning & Legacy Migrations, User Discovery, Customer and User Journey.
- **Technical & AI Acumen:** Gen AI - Python & Prototype Vibe-Coding, LLM, Agent Orchestration, ML, Data Pipeline, SQL.
- **Business & Financial Alignment:** Leadership, Risk Management, Prioritization, RACI, Cross Functional collaboration.
- **Global Program Delivery:** Multi-Market Stakeholder Management, Cross-Cultural Collaboration, Global Workforce Management (Onshore / Offshore), SAFe / Agile Execution Frameworks, Hiring and Mentoring new PMs.
- **Project Link:** Created and launched a curated movie discovery platform, customer journey mapping, leading the product from (0-to-1) concept to launch, using ML, AI, and vector DB, <https://flixkeep.com>.

EXPERIENCE

WALMART

Bentonville, Arkansas

Senior Product Manager| Digital Product & Customer Experience Leader

2023-2026

- Facilitated product discovery workshops, defined KPIs and success metrics, prioritized feature roadmaps, and partnered with engineering teams to deliver customer-focused digital experiences through iterative Agile delivery
- Leveraged GenAI, LLMs, and machine learning solutions to accelerate product discovery, improve operational efficiency, and achieve 98% forecasting accuracy across enterprise planning initiatives.
- Designed scalable data architecture and platform enhancements that improved system reliability, flexibility, and long-term operational performance.
- Led the decommissioning of a legacy Merch Planner platform, mapping technical and data dependencies across nine applications, aligning business, engineering, and data teams, and delivering \$2M+ in annualized cost savings while ensuring business continuity.
- Improved user adoption by 20% through workflow optimization, custom platform enhancements, and cross-functional change management across finance organizations.
- Designed scalable data architecture and platform enhancements that improved system reliability, flexibility, and long-term operational performance.

COGNIZANT TECHNOLOGY SOLUTIONS US CORP
Manager, (Walmart Product)

Bentonville, Arkansas
2015-2023

- Steered the parallel execution of three high-stakes enterprise products that generated \$13M in first-year operational savings and scaled to an outstanding \$80M+ four-year portfolio impact.
- Engineered a real estate automated ML tool to analyze thousands of complex vendor proposals and invoices, slashing SAP cost-processing overloads and securing timely processing by automatically highlighting incorrect claims.
- Nurtured unified global collaboration and accelerated project delivery on the high-risk DCS2K legacy forecasting migration, single-handedly directing a complex onshore-offshore matrix across multiple business units.
- Propelled a first time-right technical deployment by translating ambiguous business requirements into flawless technical stories for six offshore engineers, achieving full data validation without a single code backout (*Earned "Bronze Award for Resilience"*).
- Navigated intense global and language barriers across seven international markets—including the UK, Japan, Canada, the U.S., and South America—to seamlessly deploy an enterprise real estate Documentum management system.
- Forged a scalable multi-tenant architecture and niche, blended role-based security frameworks that standardized international folder structures and dropped global engineering delivery efforts by 20% (*Earned "Gold Award for Passion"*).
- Mobilized a task force of six engineers to successfully meet an operational deadline previously considered impossible by corporate stakeholders, securing elite organizational recognition for execution speed.

ADDITIONAL EXPERIENCE

FORTUNE 500 INITIATIVES, India

Techno-Functional Lead & Software Engineer, January 2007 – November 2015

- Forged resilient software foundations across top-tier enterprise systems, including Cognizant India, Ford Motors, Sun Life Financial, and Mahindra Satyam.
- Progressed rapidly through mainframe development and 24 / 7 production support roles, mastering complex legacy architectures under high-demand settings.
- Optimized critical job schedulers and background configurations to protect and ensure absolute data integrity for high-volume automotive and healthcare insurance systems.
- Championed rapid technical transitions and code-base overhauls to align aging enterprise software with modern organizational standards.
- Executed a massive SAS upgrade project across 1,000+ system jobs within an aggressive, strict 3-month window.
- Leveraged advanced logic and pattern recognition capabilities to earn an elite individual contributor accolade for unmatched technical delivery speed.
- Bridged the gap between business architecture and engineering execution, translating ambiguous functional user requirements into scalable algorithmic workflows.
- Engineered an automated numerical check-reading engine at Ford, applying complex nomenclature rules to automate data processing layers.
- Directly mentored cross-functional engineering teams, instilling delivery best practices and robust testing frameworks to maintain high operational uptime.

EDUCATION

UTTAR PRADESH TECHNICAL UNIVERSITY (DR. A.P.J. ABDUL KALAM UNIVERSITY), Lucknow, India
B.Tech., Electronics and Telecommunication

PROFESSIONAL DEVELOPMENT

AI Product Management Certification, AI Product Academy, Maven, 2026
Software Processes and Agile Practices, University of Alberta, 2024
SAFe Product Owner / Product Manager, SAFe by Scaled Agile, Inc., 2020
SAFe Practitioner, SAFe by Scaled Agile, Inc., 2018

LANGUAGES

Bilingual in English and Hindi.
